

LEVENT COLLEGE IB PROGRAMME VISUAL ARTS ANNUAL CIRRICULUM

Programme Name	LEVENT COLLEGE IB	Instructor Name	
Programme Duration (weeks)	40 WEEKS	Participant Name	
		Participant TR ID No	

SEPTEMBER 2024			
	SUBJECT	CONTENT	OBJECTIVE
1. WEEK	VISUALARTS	Line Study – Vertical, Diagonal, and Wavy Lines in Graphite Pencil	Students will explore and practice using vertical, diagonal, and wavy lines with graphite pencil to develop an understanding of line variation, direction, and expressive qualities in visual composition.
2. WEEK	VISUALARTS	Line Study – Vertical, Diagonal, and Wavy Lines in Graphite Pencil	Students will explore and practice using vertical, diagonal, and wavy lines with graphite pencil to develop an understanding of line variation, direction, and expressive qualities in visual composition.
3. WEEK	VISUALARTS	Sketches that reveal Students' Previous Line Quality and Showcase Their Imagination	Students will create freehand sketches using graphite pencil that reflect their current understanding of line quality and demonstrate their creativity and imagination through expressive use of vertical, diagonal, and wavy lines.
4. WEEK	VISUALARTS	Sketches that reveal Students' Previous Line Quality and Showcase Their Imagination	Students will create freehand sketches using graphite pencil that reflect their current understanding of line quality and demonstrate their creativity and imagination through expressive use of vertical, diagonal, and wavy lines.

OCTOBER 2024			
	SUBJECT	CONTENT	OBJECTIVE
5. WEEK	VISUALARTS	Drawing of Three-Dimensional Objects (Learning and Drawing with Angle, Measurement, and Proportion)	Students will learn to draw three-dimensional objects by accurately applying angle, measurement, and proportion techniques, enhancing their spatial awareness and technical drawing skills.
6. WEEK	VISUALARTS	Drawing of Three-Dimensional Objects (Learning and Drawing with Angle, Measurement, and Proportion)	Students will learn to draw three-dimensional objects by accurately applying angle, measurement, and proportion techniques, enhancing their spatial awareness and technical drawing skills.
7. WEEK	VISUALARTS	Figure Drawing (Live Human Model) – The teacher sits on a chair while students draw the outline of the figure.	Students will observe a live human model and practice capturing the figure's proportions and posture by sketching the outer contours, improving their observational and figure drawing skills.

8. WEEK	VISUALARTS	Figure Drawing (Live Human Model) – The teacher sits on a chair while students draw the outline of the figure.	Students will observe a live human model and practice capturing the figure's proportions and posture by sketching the outer contours, improving their observational and figure drawing skills.

NOVEMBER 2024

	SUBJECT	CONTENT	OBJECTIVE
--	---------	---------	-----------

9. WEEK	VISUALARTS	Still Life (A Composition of a Vase, Bottle, and Fruits) – Acrylic Painting on Canvas	Students will create a still life composition featuring a vase, bottle, and fruits using acrylic paint on canvas, focusing on color blending, light and shadow, and spatial arrangement to develop their painting techniques and artistic expression.
10. WEEK	VISUALARTS	Still Life (A Composition of a Vase, Bottle, and Fruits) – Acrylic Painting on Canvas	Students will create a still life composition featuring a vase, bottle, and fruits using acrylic paint on canvas, focusing on color blending, light and shadow, and spatial arrangement to develop their painting techniques and artistic expression.
11. WEEK	VISUALARTS	Nature Landscape – Acrylic Painting on Canvas	Students will paint a nature landscape on canvas using acrylic paints, learning to depict natural elements such as sky, trees, water, and terrain while applying techniques in color mixing, perspective, and composition.
12. WEEK	VISUALARTS	Nature Landscape – Acrylic Painting on Canvas	Students will paint a nature landscape on canvas using acrylic paints, learning to depict natural elements such as sky, trees, water, and terrain while applying techniques in color mixing, perspective, and composition.

DECEMBER 2024

	SUBJECT	CONTENT	OBJECTIVE
13. WEEK	VISUALARTS	Cityscape – Acrylic Painting on Canvas	Students will create a cityscape painting on canvas using acrylic paints, focusing on architectural forms, perspective, and urban atmosphere to enhance their skills in composition, color application, and spatial awareness.
14. WEEK	VISUALARTS	Cityscape – Acrylic Painting on Canvas	Students will create a cityscape painting on canvas using acrylic paints, focusing on architectural forms, perspective, and urban atmosphere to enhance their skills in composition, color application, and spatial awareness.
15. WEEK	VISUALARTS	Bird Species – Acrylic Painting on Canvas	Students will paint various bird species on canvas using acrylic paints, exploring the use of color, texture, and detail to accurately represent feathers, form, and natural habitats while developing their observation and painting techniques.

16. WEEK	VISUALARTS	Bird Species – Acrylic Painting on Canvas	Students will paint various bird species on canvas using acrylic paints, exploring the use of color, texture, and detail to accurately represent feathers, form, and natural habitats while developing their observation and painting techniques.
----------	------------	---	---

JANUARY2025			
	SUBJECT	CONTENT	OBJECTIVE
17. WEEK	VISUALARTS	Space-Themed Acrylic Painting on Canvas	Students will create a space-themed painting on canvas using acrylic paints, experimenting with color blending, texture, and imaginative compositions to depict celestial bodies and cosmic scenes, enhancing their creativity and painting skills.
18. WEEK	VISUALARTS	Space-Themed Acrylic Painting on Canvas	Students will create a space-themed painting on canvas using acrylic paints, experimenting with color blending, texture, and imaginative compositions to depict celestial bodies and cosmic scenes, enhancing their creativity and painting skills.
19. WEEK	VISUALARTS	Space-Themed Acrylic Painting on Canvas	Students will create a space-themed painting on canvas using acrylic paints, experimenting with color blending, texture, and imaginative compositions to depict celestial bodies and cosmic scenes, enhancing their creativity and painting skills.
20. WEEK	VISUALARTS	Detailed Portrait Study of the Human Face and Sensory Organs	Students will create a detailed portrait focusing on the human face and sensory organs, developing their skills in anatomy observation, proportion, shading, and fine detail to enhance realism in portrait drawing or painting.

FEBRUARY 2025			
	SUBJECT	CONTENT	OBJECTIVE
21. WEEK	VISUALARTS	Semi-Abstract Human Portrait Study	Students will create a semi-abstract portrait of a human figure, exploring abstraction techniques and creative expression while maintaining recognizable facial features, to develop their artistic interpretation and stylistic skills.
22. WEEK	VISUALARTS	Semi-Abstract Human Portrait Study	Students will create a semi-abstract portrait of a human figure, exploring abstraction techniques and creative expression while maintaining recognizable facial features, to develop their artistic interpretation and stylistic skills.

23. WEEK	VISUALARTS	Semi-Abstract Human Portrait Study	Students will create a semi-abstract portrait of a human figure, exploring abstraction techniques and creative expression while maintaining recognizable facial features, to develop their artistic interpretation and stylistic skills.
----------	------------	------------------------------------	--

24. WEEK	VISUALARTS	Sculpture and Ceramic Human Figure Studies	Students will create human figure sculptures using ceramic materials, learning techniques of modeling, shaping, and texturing to develop three-dimensional artistic skills and an understanding of human anatomy in sculpture.
----------	------------	--	--

MARCH 2025			
	SUBJECT	CONTENT	OBJECTIVE
25. WEEK	VISUALARTS	Sculpture and Ceramic Human Figure Studies	Students will create human figure sculptures using ceramic materials, learning techniques of modeling, shaping, and texturing to develop three-dimensional artistic skills and an understanding of human anatomy in sculpture.
26. WEEK	VISUALARTS	Sculpture and Ceramic Human Figure Studies	Students will create human figure sculptures using ceramic materials, learning techniques of modeling, shaping, and texturing to develop three-dimensional artistic skills and an understanding of human anatomy in sculpture.
27. WEEK	VISUALARTS	Fantasy-Themed Acrylic Painting on Canvas	Students will create a fantasy-themed painting on canvas using acrylic paints, exploring imaginative concepts, vibrant colors, and creative composition to develop their storytelling and artistic expression skills.
28. WEEK	VISUALARTS	Fantasy-Themed Acrylic Painting on Canvas	Students will create a fantasy-themed painting on canvas using acrylic paints, exploring imaginative concepts, vibrant colors, and creative composition to develop their storytelling and artistic expression skills.

APRIL 2025			
	SUBJECT	CONTENT	OBJECTIVE
29. WEEK	VISUALARTS	Abstract Painting Featuring Geometric Shapes	Students will create abstract paintings incorporating geometric shapes, focusing on composition, color harmony, and balance to develop their understanding of abstraction and design principles.
30. WEEK	VISUALARTS	Abstract Painting Featuring Geometric Shapes	Students will create abstract paintings incorporating geometric shapes, focusing on composition, color harmony, and balance to develop their understanding of abstraction and design principles.
31. WEEK	VISUALARTS	Reproduction Painting on Canvas	Students will practice reproduction techniques by replicating a selected artwork on canvas, focusing on accuracy, detail, and mastering painting skills to enhance their technical ability and understanding of art styles.
32. WEEK	VISUALARTS	Reproduction Painting on Canvas	Students will practice reproduction techniques by replicating a selected artwork on canvas, focusing on accuracy, detail, and mastering painting skills to enhance their technical ability and understanding of art styles.

MAY 2025			
	SUBJECT	CONTENT	OBJECTIVE
33. WEEK	VISUALARTS	Genetic engineering, cloning, CRISPR	Students will create visual artworks inspired by the themes of genetic engineering, cloning, and CRISPR, exploring concepts of biology, identity, and transformation through creative expression and mixed media techniques.
34. WEEK	VISUALARTS	Manufacturing processes, green chemistry	Students will explore the concepts of manufacturing processes and green chemistry through visual art, creating works that reflect sustainability, innovation, and environmental awareness using eco-friendly materials and techniques.
35. WEEK	VISUALARTS	Robotics, AI, mechanical systems	Students will create visual artworks inspired by robotics, artificial intelligence, and mechanical systems, experimenting with form, structure, and technology-themed aesthetics to explore the relationship between humans and machines.
36. WEEK	VISUALARTS	Comprehensive review, mock tests	Students will engage in a comprehensive review of key visual art concepts and techniques through practical projects and mock assessments, reinforcing their skills and preparing for real-world artistic challenges and evaluations.

JUNE 2025			
	SUBJECT	CONTENT	OBJECTIVE
37. WEEK	VISUALARTS	Research, experiment design, analysis	Students will conduct research and design experimental art projects, applying analytical skills to evaluate their creative processes and outcomes, fostering innovation and critical thinking in visual arts.
38. WEEK	VISUALARTS	Ethical implications, science in daily life	Students will explore the ethical implications of scientific advancements and their impact on daily life through visual art, creating meaningful works that provoke reflection on social responsibility, technology, and human experience.
39. WEEK	VISUALARTS	Practice exams, revision strategies	Students will develop effective revision strategies and complete practice exams to consolidate their knowledge of visual art techniques and concepts, enhancing their confidence and readiness for formal assessments.
40. WEEK	VISUALARTS	Cumulative assessment	Students will demonstrate their comprehensive understanding of visual art concepts, techniques, and creative processes through a cumulative assessment that integrates skills learned throughout the course.
